

Pre and Post Survey Interpretation

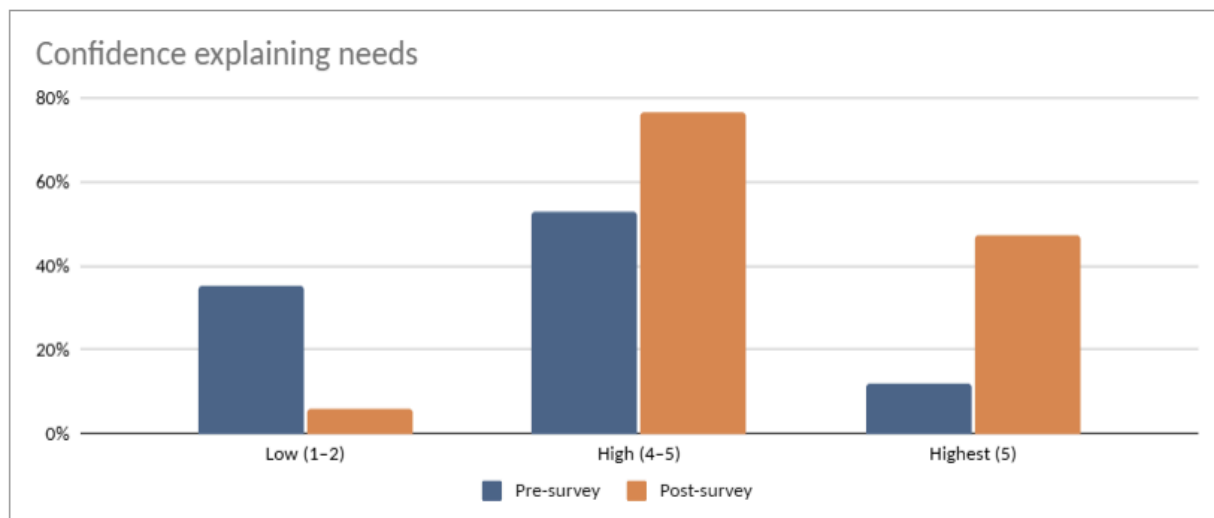

There were two questions asked through the pre- and post- survey that used Likert scale ratings with 5 representing Strongly Agree down to 1 representing Strongly Disagree.

Question: I understand how to communicate with my instructors.

From left to right, the percentage of students rating their **understanding** as low (1–2) fell from 17.6% before the workshop to 5.9% afterward. The percentage rating their understanding as high (4–5) rose from 41.2% to 76.5%. Within that high group, the percentage choosing the highest rating (5) rose from 17.6% to 52.9%.

Question: I feel confident explaining my accommodation needs to my instructors.

From left to right, the percentage of students rating their **confidence** as low (1–2) fell from 35.3% before the workshop to 5.9% afterward. The percentage rating their confidence as high (4–5) rose from 52.9% to 76.5%. Within that high group, the percentage choosing the highest rating (5) rose from 11.8% to 47.1%.

Overall, the survey responses show gains in both understanding and confidence following the workshop.
